SUMMARY

AI and automation builder who ships production systems and keeps them running. Built and operate DarkoApp, a live AI web app with RAG, multi-model LLM routing and Stripe billing, plus a Dockerized content engine that writes, renders, routes for human approval and schedules social posts every day. Before that, founded Nxgen Media, a VFX company in India and the USA (2019-2025), and sold it. Started in film and TV production.

EXPERIENCE

Founder & CTO, AI Systems & Automation — DarkoApp Feb 2026 – Present

- Built and operate DarkoApp, a live AI web and mobile app (Expo / React Native, TypeScript) on Supabase: Postgres with row-level security, auth, edge functions and scheduled jobs, with Stripe billing.
- Designed the AI engine: intent classification, streaming answers, structured JSON output and automatic fallback to a second model on timeouts.
- Built retrieval (RAG) with embeddings and vector search over about 140 curated passages after purging around 2,400 noisy OCR rows. GitHub Actions smoke tests compare the live engine with a saved baseline before and after prompt changes.
- Built a daily content engine (Python, Docker, Telegram Bot API): topic bank, LLM script plus logic check, HTML slides and ffmpeg video, human approval in Telegram, then scheduling to X, LinkedIn, Bluesky and Telegram through the Postiz and Buffer APIs.
- Health checks every 15 minutes with de-duplicated alerts; rollback images, database snapshots and 70 automated checks before every deploy.
- Moved video rendering to an owned GPU over a Tailscale private network, removing about $2.50 of cloud GPU cost per video.
- Run a local ComfyUI render engine on an RTX 3090 (Wan 2.2, MiniMax, Flux, Qwen-Image); with n8n, the pipelines produce 4-5 pieces of image, video and voice content a day. Trained a Wan 2.2 character LoRA for a consistent on-screen identity.
- Built an MCP server (Node, TypeScript, 38 tests) so AI assistants can call DarkoApp's engine as a tool.
- Built a job search assistant (Python, Streamlit, Groq) that searches Indeed, LinkedIn and about 300 company career boards, scores jobs on three models in parallel, and builds a tailored resume, cover letter and portfolio page per job.
- Built a 3,000-contact outreach database with automated newsletter campaigns and ongoing sourcing.
- Build with AI coding agents (Claude Code, Codex, Cline) and run open-weight models locally (Qwen, Gemma via Ollama).

Treasurer & Social Media Manager — VES Georgia (Visual Effects Society) 2025 – Present

- Board treasurer overseeing chapter finances; manage the chapter's social media.
- Administered virtual voting and provided technical support for the VES Awards.

Founder — Nxgen Media, VFX company (India and USA) Apr 2019 – Oct 2025

- Founded, managed and operated the company; won and delivered client projects.
- Exited the company through a sale in 2025.

Film and TV Production India 2011 – 2019, USA 2020 – 2023

- Health and Safety PA on Servant (Season 4), The Wonder Years and Descendants: The Rise of Red.
- Assistant editor and assistant director on film productions in India.
- Wrote original screenplays, registered with the writers' union in India.

SKILLS

AI and LLMs: Claude, ChatGPT, Gemini, DeepSeek, Groq; RAG, structured output, model fallback, classifiers, MCP, local models (Ollama, Qwen, Gemma)

Automation and integration: n8n, REST APIs, webhooks, Telegram Bot API, Postiz, Buffer, Stripe, Supabase Edge Functions, cron, Docker Compose, GitHub Actions

Code and data: Python, TypeScript / JavaScript, SQL (Postgres), Streamlit, Playwright, HTML / CSS, ffmpeg, GA4

Creative AI: ComfyUI, Wan 2.2, MiniMax, Flux, Qwen-Image, LoRA training, text-to-speech, AI music

Business and production: company operations, client acquisition, a full business exit, board treasurer, film editing and directing

EDUCATION

Bachelor of Engineering, Computer Science — Saveetha University, India 2011
