I'm not a career engineer or a career marketer. I keep building things from zero and finishing them. Six years on film sets, a media company I ran for six and a half years and sold, and now AI products I build alone. I design the system — model, retrieval, prompts, safety lines — and direct AI coding tools to build it.

NOW

Founder, DarkoApp

Feb 2026 – present

Nxgen Media LLC · Atlanta

An AI that reads a conversation and says what's really going on — the questions mainstream assistants soften or refuse. The fight: an uncensored product that still holds hard limits.

- Designed the AI end to end: benchmarked DeepSeek, Qwen, Gemma; built RAG over psychology books in Supabase/pgvector.
- Built the safety floor myself: red-team tests for minors, non-consent, crisis signals and prompt injection, plus a consent-based usage policy.
- Shipped solo: Expo/React Native, Supabase, Netlify, Stripe, three paid tiers.
- Built a self-hosted content factory (n8n, RunPod, Ollama, FFmpeg, Postiz) for image, video and voice.
- **Honest status:** live, no meaningful traction yet. Distribution is the problem I'm still solving.

THE JOURNEY

Founder, Nxgen Media Pvt Ltd — India

2019 – 2025 · sold

Built, ran and sold a media company. Hosted a VFX podcast. Built a 3,000+ VFX producer and director database with automated newsletters.

Taught me how to start, sustain and exit.

Health & Safety PA — US productions

2021 – 2023

Servant · The Wonder Years · Descendants: The Rise of Red

Taught me to stay calm with a crew on the clock and enforce rules without making enemies.

Assistant Director — India

2015 – 2018

Taught me to turn schedule chaos into order and read people fast.

Treasurer & Social, VES Georgia Board

Ongoing

Chapter finances, social media, virtual voting and tech support for the VES awards.

Taught me trust comes from being boringly reliable.

WHAT I DO FOR YOU

Idea to working AI system, fast, no big team.

Automation that replaces manual work.

AI safe enough to ship in risky territory.

A bridge between production and tech.

WHY I STAND OUT

Worked a film set. Built and sold a company. Built an AI product alone, safety rules included.

TOOLS

AI: DeepSeek, Qwen, Gemma (Ollama), pgvector RAG, ComfyUI, Wan 2.2, Chatterbox

Build: Expo/React Native, Supabase, Netlify, Stripe, n8n, Docker, FFmpeg

AI coding: Claude Code, Cursor, Cline

Production: Unreal Engine, Mistika VR

EDUCATION

B.E. Computer Science
Saveetha University, India · 2011

STRAIGHT TALK

No salaried engineering or marketing role yet. I don't hand-code without AI tools — I design the system and make the AI build it right.
